1) Introduction

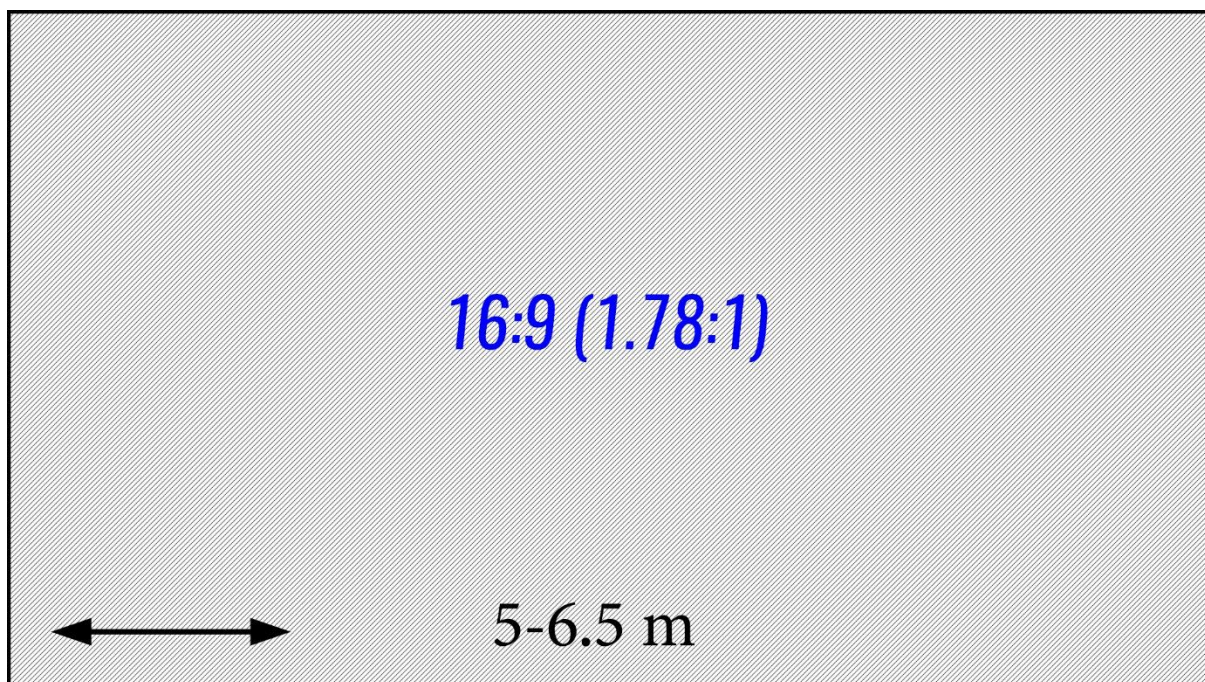

At Glasir we wish to procure a big screen that meets our requirements for the atrium. Hundreds of people can gather at this location and therefore it is important that the screen is well seen both when you are near, and far away from the screen.

2) Requirements

We want a screen that is between **5 to 6.5 meters** in width.

The screen must meet these minimum requirements:

- Aspect ratio: **16:9 (1.78:1)**
- Pixel pitch: **maximum 1.27 mm**
- The solution should be able to show at least one HDMI source.
- 3-year warranty

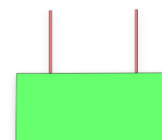

Picture 1 – screen requirement

3) Description of atrium

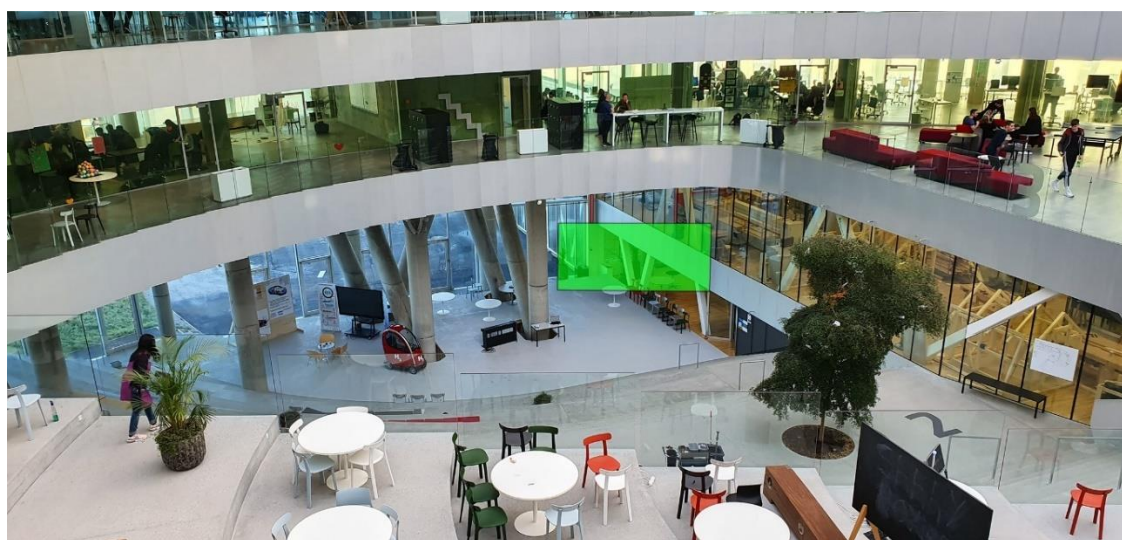

Picture 2 – Description of the desired solution in atrium.

Picture 2 illustrates the solution we imagine getting at Glasir. The screen is placed so that most of the audience can see the screen. This means that the right side of the screen is mounted slightly in front, so that the screen is inclined towards the crowd.

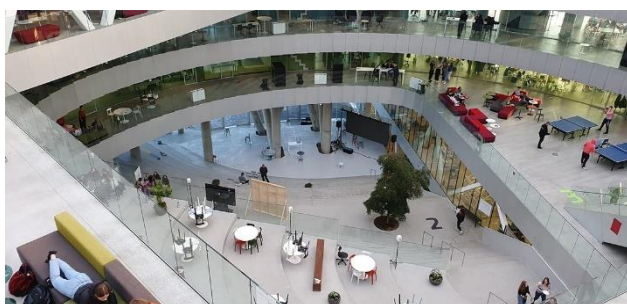

Picture 3 – How we imagine the mounting

We imagine the screen hangs from the ceiling and does not hinder any escape routes. Picture 3 illustrates how we imagine the mounting. We want the supplier to provide a suitable mounting solution that is good-looking and durable.

Picture 4 – Description of the desired solution in atrium viewed from 4th floor.

4) Example – Mobile screen in atrium

On these pictures a 4.5-meter-wide mobile screen is seen in the atrium.

This is not the solution we desire but these pictures are attached to give you a real idea of how such a screen fits in the atrium.

5) Mounting and setup

It is considered positive if the provider has the possibility to provide mounting of the screen on-site. However, we require that a mounting solution is offered, with or without setup.

6) Visit us

We see it as an advantage if the provider visits us, to see the atrium and to talk about possible solutions, before the offer is given.

7) In conclusion

We want the following offers:

7.1) Big screen

- 5-6.5 meters in width
- Aspect ratio: **16:9 (1.78:1)**
- Pixel pitch: **maximum 1.27 mm**
- The solution should be able to show at least one HDMI source.
- 3-year warranty

7.2) Mounting and setup

- Materials and solution to ceiling mount the screen (or other suggested mounting method)
- Labour to mount the screen (Option)

8) Questions and terms

Questions should be in writing and sent to Áki Heinesen Højsted via e-mail to ahh@glasir.fo

The deadline for asking questions is **11th of December 2019 at 12:00 local time**. Answers are published on "[Keypsportalurin](#)" as soon as they are answered.

The deadline for handing in offers is **12th of December 2019 at 12:00 local time**, and negotiations being as soon as possible. The winner of the tender is announced at the latest **17th of December 2019**.

Glafir designates the right to not accept any offer if we deem none to meet our requirements.

All offers, with materials, must be sent to ahh@glasir.fo in PDF format, and the price should be inclusive shipping, taxes and delivery to Glasir.
