

Broyting í kravfesting til “Stórskíggi í Atrium á Glasi útboð 2019”

Góðu veitarar,

vit á Glasi vóru á vitjan í KVF mánadagin 2/12 fyri at síggja stórskíggjan tey nýta í D&V. Hetta gav okkum eina ítøkiliga uppliving av hvussu ein skíggi ið er 5 metrar breiður við 2,6 pixel pitch riggar.

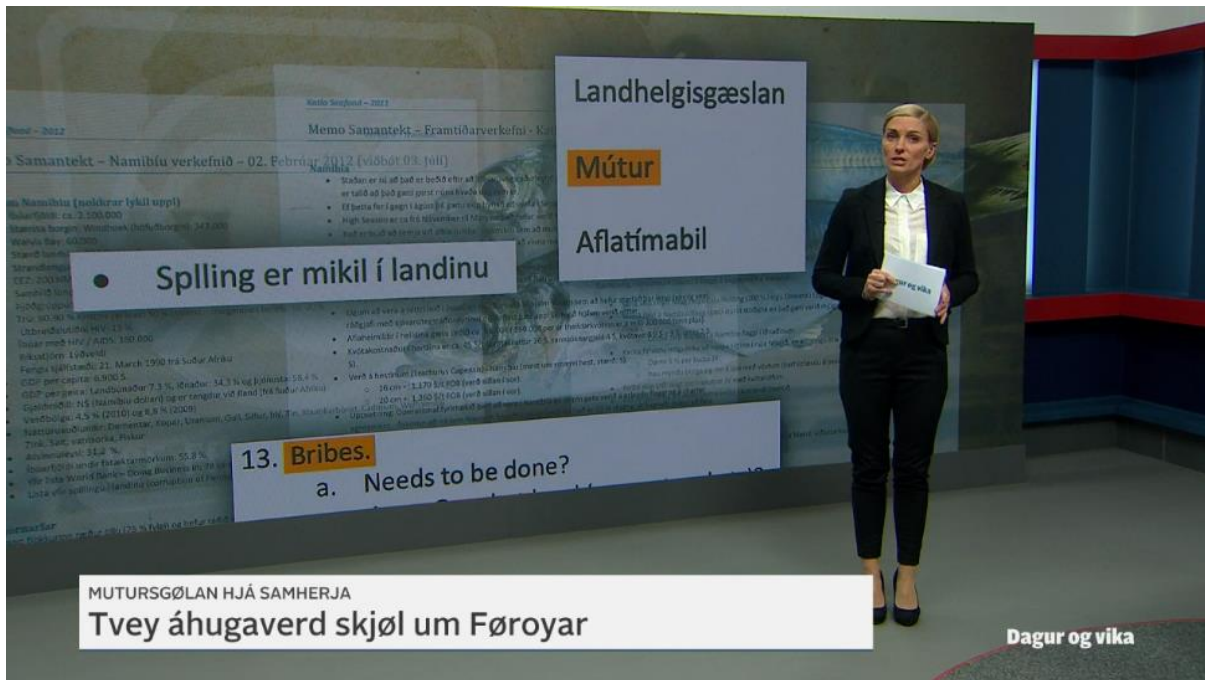

Figure 1 – Mynd av stórskíggja í KVF / Picture of big screen in KVF (kelda/source: kvf.fo)

Vit vóru somikið væl nøgdir við skermin, at vit hava valt at slaka okkara krav um “pixel pitch” frá 1,27 mm til **2,6 mm**.

Sostatt er krafestingin til “pixel pitch” hereftir hægst 2,6 mm.

Amendment to requirement in “Big screen in Atrium at Glasir tender 2019”

Dear providers,

we at Glasir visited the public service broadcaster KVF on Monday 2/12 to see the big screen they use in their news broadcast. This gave us a concrete experience of how a screen that is 5 meters wide with a pixel pitch of 2.6 is like.

We were so pleased with the screen that we have decided to slacken our requirement of a pixel pitch of 1.27 mm to **2.6 mm**.

Consequently, our requirement of pixel pitch is henceforth a maximum of 2.6 mm.
