

## Broyting 2 í kravfesting til “Stórskíggi í Atrium á Glasi útboð 2019”

Góðu veitarar,

Fyrir at sleppa undan trupulleikum við óvanligari upplýsing, verður það sæð positívt um skermurinn hefur ein standard upplýsing.

Her er hugsa vit um teir mest vanligu **Full-HD** og **4K** (1920 x 1080 og 3840 x 2160).

Við nýggju pixel pitch kravfestingini, so passar hetta ikki heilt inn í okkara avmarking í skerm breidd. Tískil hava vit valt at loyva skerm stódd niður á **4800 mm**.

### Dømi / Example:

1920 x 1080 (Full-HD)

$1920 * 2,6 = 4992 \text{ mm}$

$1920 * 2,5 = 4800 \text{ mm}$

3840 x 2160 (4k)

$3840 * 1,3 = 4992 \text{ mm}$

**Sostatt er kravfestingin til breidd hereftir millum 4,8 til 6,5 metrar.**

## Amendment 2 to requirement in “Big screen in Atrium at Glasir tender 2019”

Dear providers,

In order to avoid issues with unusual resolutions, it is seen as an advantage if the screen has a standard resolution.

Here we think of the most common **Full-HD** and **4K** (1920 x 1080 og 3840 x 2160).

With the new pixel pitch requirement, this does not quite fit into our screen width restriction. Therefore, we have chosen to allow screen sizes down to **4800 mm**.

**Consequently, our requirement of screen width is henceforth between 4.8 to 6.5 meters.**
